

New Showroom Information

Performance Characteristics

- Maintenance Free - ES does not require sealing.
- Stain resistance of ES is comparable to that of Quartz Surfaces.

Environmental Characteristics

- Recycled Content - The recycled glass content of ES catalog colors ranges from 78-82% by weight.
- Indoor Air Quality - The binder used in ES is a 100% solids Zero VOC resin.
- LEED - ES may contribute LEED points for MR 4.1-4.2, MR 5.1, EQ 4.1 and ID (Innovation in Design – recycled content 30% or greater)

Fabrication Characteristics

- ES is fabricated similar to stone and quartz (engineered stone) surfacing. Most fabrication shops have found that ES can be processed with the same tooling speeds and considerations as are common with quartz surfacing.

Ordering Information.

- Payment - Rust Brothers requires 50% down to place an order into production, with balance due prior to shipping.
- Remittance - Payments should be made to Rust Brothers LLC.
- Lead times - Once an order is placed you can expect your material to ship in 2-3 weeks. Please plan your project accordingly. (Lead times are subject to current work load and are subject to change.)

Shipping Information

- Crating charges for most orders are \$200.00 which includes the A-Frame and handling charges.
- Shipping costs vary depending on location, and will be quoted prior to shipping.

Slab Sizes

- ES is offered in both 2cm and 3cm. (2cm panels are an excellent choice for fabricating countertops with an apron and a miter fold joint.)
- ES is offered in 30" wide panels up to 120" (10 feet) long. We will manufacture panels to specific length (in 1' increments). For example, you can purchase a 30" x 60" panel for a vanity, and avoid the waste of a full panel.

Maintenance

- Clean ES countertops with a neutral PH, non-abrasive cleaner. Soap and water will work just fine.
- ES is not suitable for exterior installation.
- Always use a trivet or cutting board on ES (as is the case with quartz/engineered stone).

Miscellaneous

- Custom blends are available, please contact us for details.
